

PASSPORT DATA SHEET

CFP2 DCO

Champion ONE's digital coherent optic (DCO) in the CFP2 form factor is ideal for line-side trunk DWDM data center interconnects, metro carrier, and regional/long-haul applications. Unlike analog coherent optics (ACO), Champion ONE's DCO CFP2 features the digital signal processor (DSP) chip on the optic itself, instead of on the switch line card. This improves network flexibility by enabling the transceiver's use across all platforms with the CFP2 interface and decreases the complexity of tuning required.

Champion ONE Passport transceivers are programmed for universal compatibility across multiple OEM platforms. This open methodology reduces costs and unlocks operational simplicity by reducing sparing costs.

Technical Specifications

STANDARDS AND REGULATORY COMPLIANCE

RoHS 6/6 compliant
CFP2 MSA IEEE 802.3 Clause 45

PROTOCOLS AND DATA RATES

100G Ethernet (103.125 Gbps)
OTN OTU4 4L1-9D1F (112 Gbps)

CONNECTOR

LC connector

WARRANTY

All feature a limited 1-year warranty

NOTES

Includes MDIO digital diagnostics
Includes embedded PRBS generator/analyizer for line and client side interfaces
Supports low-latency soft-decision FEC

DCO CFP2 transceivers are fully tunable across the 50GHz ITU-T grid frequency range, and support flex-grid DWDM tuning. It can soft-select among three phase modulation schemes for different applications:

- Dual-Polarization Quadrature Phase Shift Keying (DP-QPSK), for 100G Ethernet transmission over distances up to 2000km.
- Dual-Polarization 8 Quadrature Amplitude Modulation (DP-8QAM), for 200G Ethernet transmission over distances up to 800km.
- Dual-Polarization 16 Quadrature Amplitude Modulation (DP-16QAM), for 200G Ethernet transmission over distances up to 300km
